To whom it may concern,

RE: CONTRIBUTION TO ASC SOFTWARE OF THE MOBILE APPS TECHNICAL SPECIALIST ROLE

ASC Software is a pioneering company in the burgeoning mobile applications market, including development on the Apple iPhone, iPad and Android platforms. ASC Software over the course of the last two years has invested considerable effort and expense in the creation of an iPad/iPhone based Job Management system and the Mobile Apps Technical Specialists employed by ASC Software are critical for the success of the project.

Candidates to fill the Mobile Apps Technical Specialist position that have both the required skill set combined with the aptitude and attitude to fit well into the ASC Software organisation are difficult to find in the current market. The position for which Adiwena has been selected was advertised on Seek.com.au for a six (6) month period and did not result in any other suitable candidates.

Adiwena is required to assist ASC Software with ongoing development projects in Objective C on the iOS platform. As such projects are critical to the ongoing success of the company, I respectfully request that his work visa to allow him to continue contributing to ASC Software is granted at your earliest convenience.

You may contact me directly on +61 450 920 658 should you have any further questions or seek to verify the information contained within.

Yours faithfully,

Courtney Smith
Director
ASC Software
